

ZERO KNOWS

LAPTOP CASES

AS AN ADDITION TO THE ZERO TRANSITAINER™ LINE OF CASES, ZERO Manufacturing offers 4 different Laptop Case configurations that can safely transport 6, 8, 10 or 12 laptops.

The ZERO Laptop Cases contain an integrated insert that combines the highest quality foams with rigid partitioning that yields exceptional protection for laptop computers and accessories during shipment. Unlike solid foam interiors which seek to protect each individual piece, the interiors function as an integrated protection system that anticipates and compensates for the external and internal forces likely to occur during shipment. These cases provide better protection than solid foam interiors, they also take up less space, and decrease the required case size needed for a given number of laptops.

CASE FEATURES:

- Zinc Hardware is standard unless otherwise noted in part number ordered.
(See back page for ordering details and options)
- Made from rotationally molded polyethylene plastic.
- Uniform wall thickness.
- Extra rugged corner construction.
- Recessed hardware for added protection.
- Meets ATA 300, Category 1, and applicable portions of MIL-T-28800, MIL-C-4150 and MIL-STD-108 specifications.
- Spring-loaded, rattle proof handles with 90-degree stops.
- Cam action latches are standard, with optional locking hasps.
- Interlocking ribs, top and bottom allow for stacking of containers.

LAPTOP CASE FEATURES

- Transports multiple laptops; provides rigid foam protection
- Custom configurations available for any number of laptops and notebooks, accessories, power supplies, and cables
- Compounded color impregnated directly into polyethylene shells
- Wide range of colors available using FED-STD-595 guidelines
- Gasketed construction with integral tongue and groove closure interlocks top and bottom for environmental protection
- Integrally molded tongue and groove closure for a watertight seal
